The graph displays the monthly average flow rates (m³/s) over a year. The Y-axis ranges from 0.0 to 3.6 m³/s. The X-axis shows the months from January to December. A solid blue line represents the monthly averages, and a dashed red line represents the long-term mean. The monthly average line shows significant seasonal variation, with a major peak in June (around 3.5 m³/s) and smaller peaks in March and April. The long-term mean line is relatively flat around 0.5 m³/s. The graph illustrates the variability of the streamflow throughout the year.
