The graph illustrates the monthly average flow (m³/s) over a year. The x-axis represents the days of the year (1 to 365). The y-axis represents the flow in m³/s, ranging from 0.2 to 10.2. The solid blue line shows the daily mean flow, which is highest in summer (around 1.10 m³/s) and lowest in winter (around 0.2 m³/s). The dashed red line shows the daily maximum flow, which also follows a similar seasonal pattern but with higher values in summer (up to 10.2 m³/s) and lower values in winter (down to 0.2 m³/s). The graph shows several sharp peaks in summer, particularly in July and August, indicating high-flow events.
