The graph illustrates the monthly average flow rates (m³/s) over a year. The Y-axis represents the flow rate, ranging from 0.1 to 4.1. The X-axis represents the days of the year, from 1 to 365, with month markers (1, 31, 59, 90, 120, 151, 181, 212, 243, 273, 304, 334, 365) and months (I, II, III, IV, V, VI, VII, VIII, IX, X, XI, XII) indicated. A solid blue line represents the daily mean flow, which shows significant seasonal variation, peaking around 2.8 in April and October, and dipping to near zero in January and February. A dashed red line represents the cumulative total flow since the start of the year, starting at 1.0 and increasing steadily but remaining below the 1.1 m³/s threshold throughout the entire period.
